

LIKE A DIAMOND...

# A FLECK 5600 MAY ACTUALLY LAST FOREVER

**STRUCTURAL**

Install water treatment equipment featuring a Fleck 5600 and you know it goes to work... maybe forever.

While most other brands require service calls that cost you money and aggravate your customers, 5600's work without maintenance for years on end. Well over a million systems have made Fleck 5600's performance and durability legendary... and for a reason. We fatigue-test 5600's in the industry's most stringent way, far exceeding WQA standards, passing them through 250,000 pressure cycles up to 190 psi and through 10,000 complete, non-stop regeneration cycles.

**THAT IS THE EQUIVALENT OF 27 YEARS OF UNINTERRUPTED DAILY USE!** In our book, that gets pretty darn close to forever!

No one makes valves like Fleck does. And we know of no valve that lasts like 5600's do. So, give your residential customer the best ... a Fleck diamond.

**FLECK 5600 ...**

# MAYBE FOREVER

(By the way, always specify the *original* STRUCTURAL pressure vessel. We torture-test them in pretty much the same way we do the 5600's: 250,000 cycles at 150 psi.)
