

BRINE TANK ASSEMBLY MANUAL

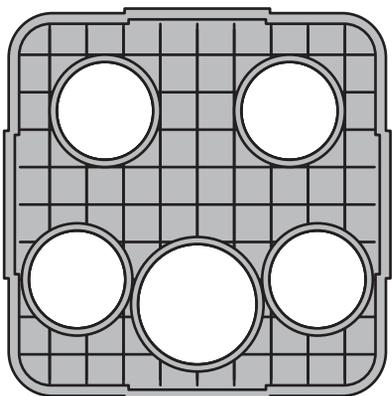

Parts

(4) Grid Cups

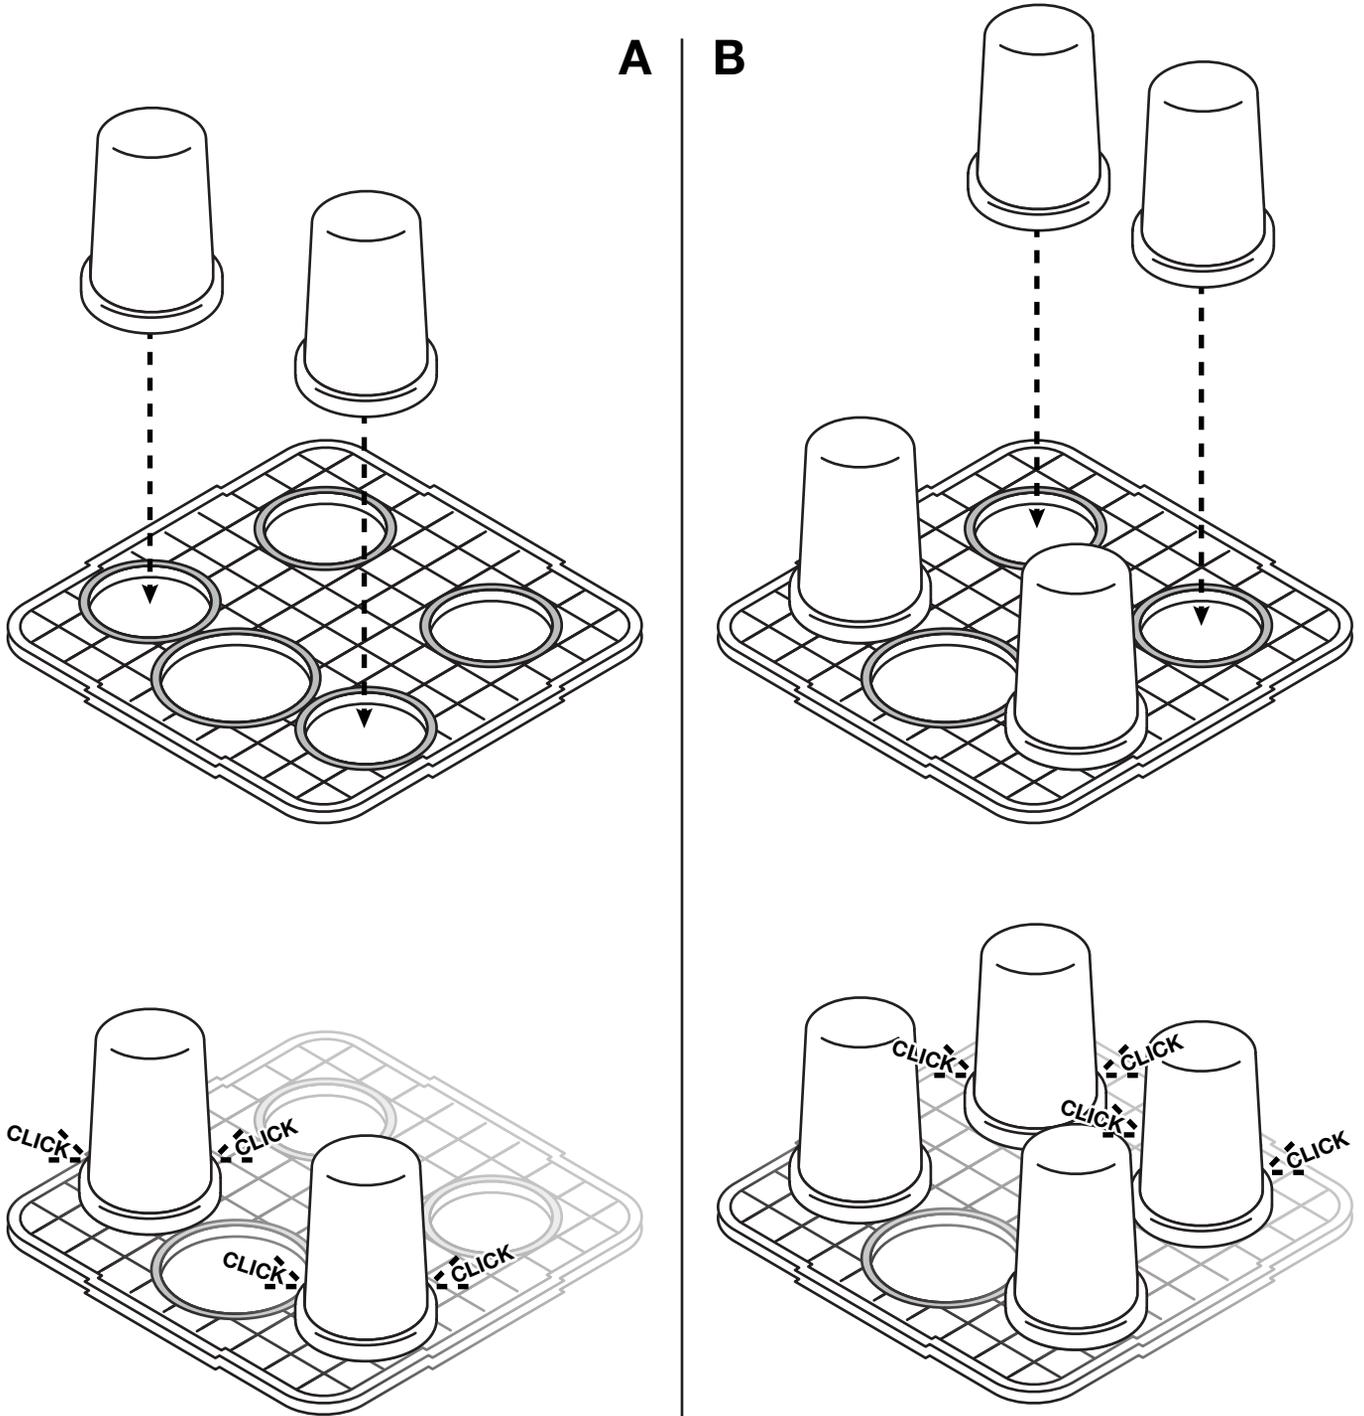

Salt Grid Plate

Step 1:

Place salt grid with grid lines facing up, take grid cups with larger end facing down and snap into place.

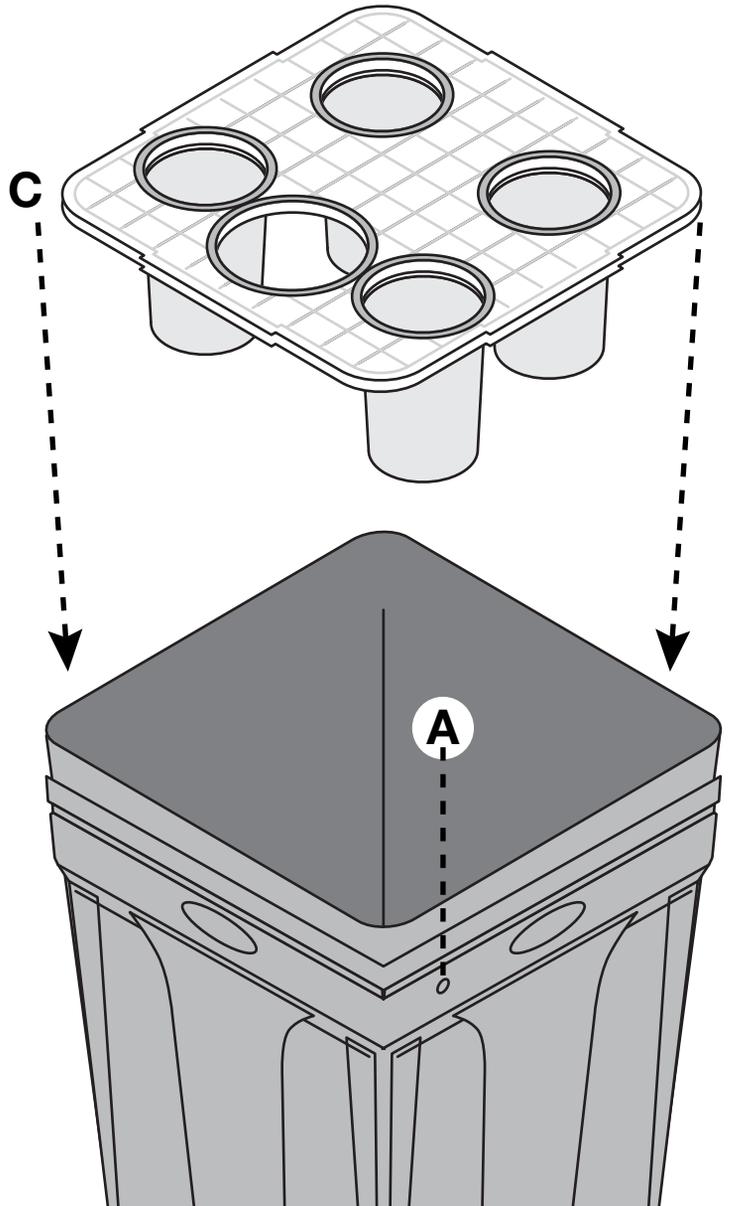

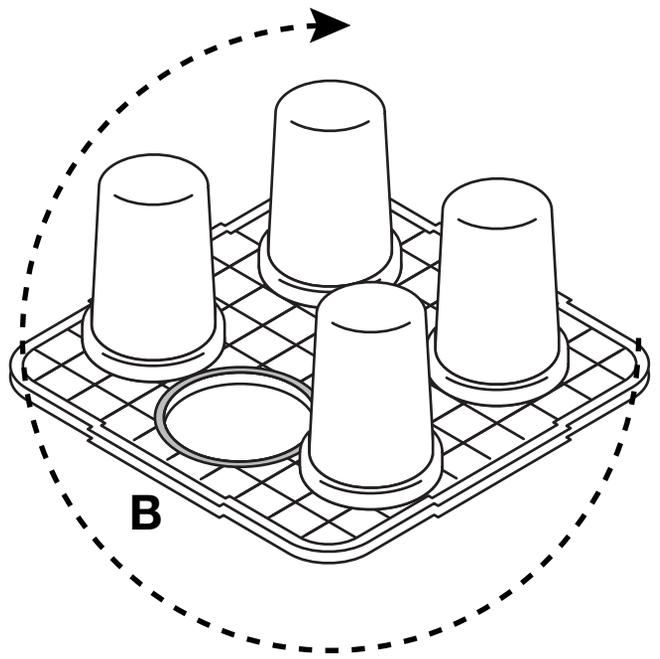

Step 2:

A. Place brine tank in front of you with the hole on the side of tank to your right.

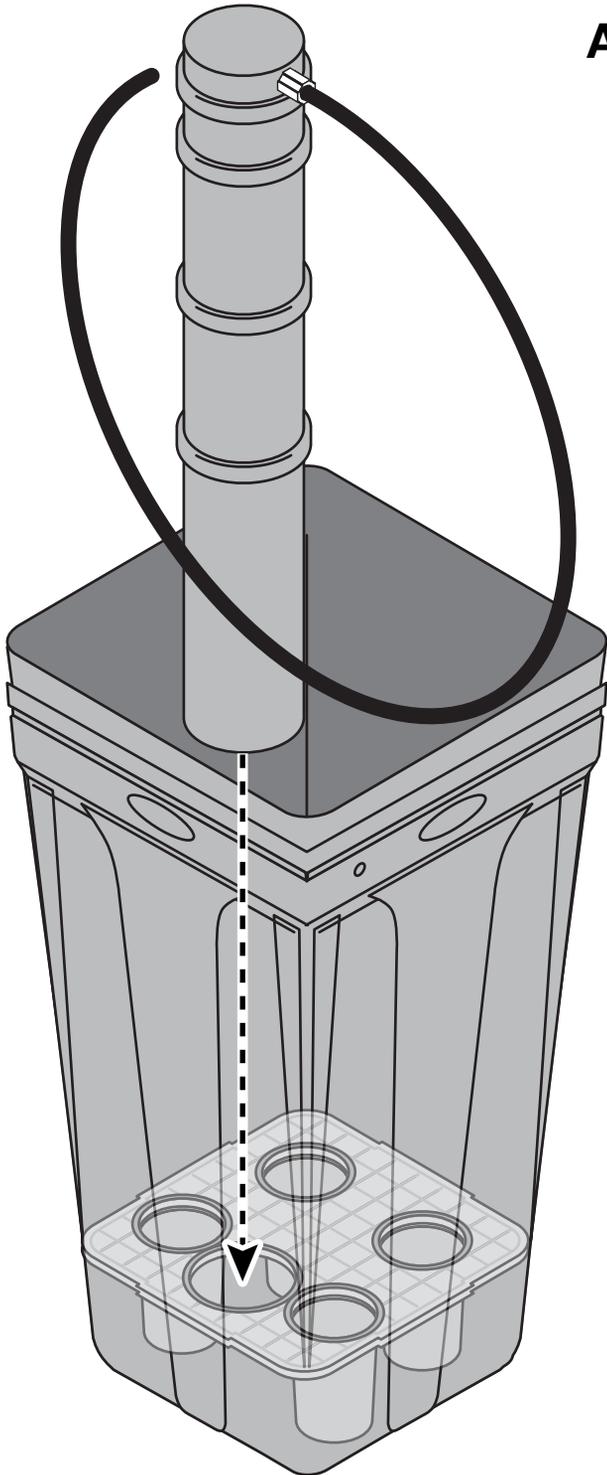

B. Flip salt grid plate over so the grid cups are facing down and face larger hole (without a cup) towards you.

C. Lower salt grid into tank and push into the bottom.

Step 3:

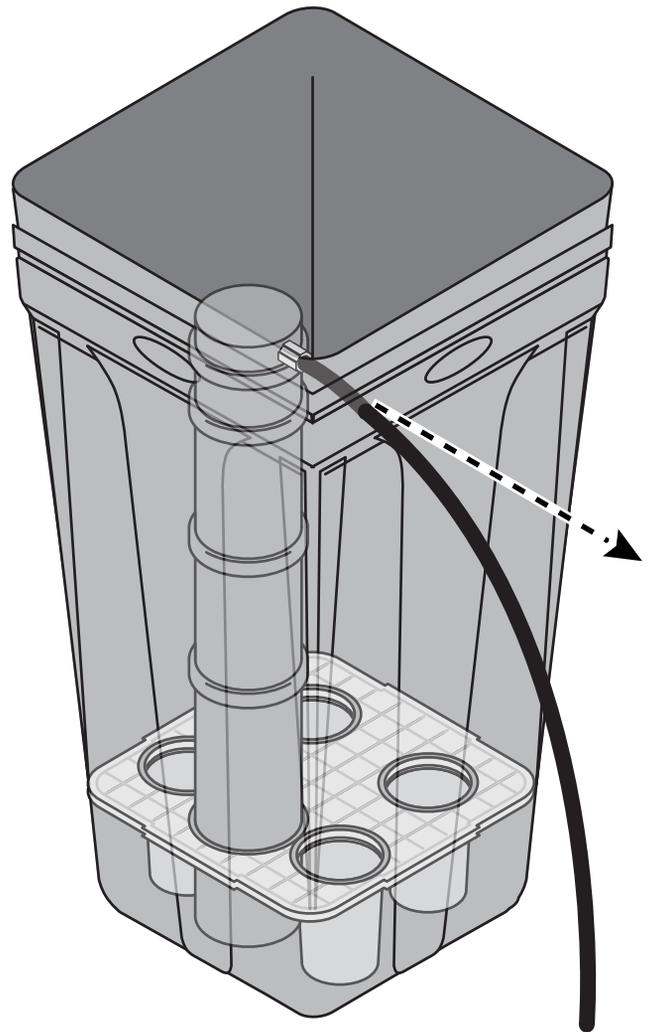

(A) Orient brine well with tubing end facing up, pointed towards hole in side of brine tank, then fit bottom of brine well into larger center circular opening in the salt grid plate at the bottom.

A

B

(B) Thread brine well tubing through hole in top side of brine tank.

Before Operation:

Check the safety float inside the **brine well housing** to make sure the pin at the top of the float **(A)** is lined up with hole and the float can move freely **(B)** up and down.
